PROFESSIONAL EXPERIENCE

AUG 25 - NOW **EDMOND DE ROTHSCHILD AM - Quantitative Developer for Liquid Assets :** ***PARIS - FRANCE***

- **Quantitative Engineering:**
  - Engineered an FX futures reclassification model to reallocate currency effects for computing local-currency returns and contributions across all portfolio aggregation levels for 45+ hedged funds, combined **AUM : €32bn.**
  - Built a Carino-based performance attribution linking model to chain daily contributions and analyze P&L drivers over time, ε_t **< 0.0001%.**
- **Software Engineering**:
  - Built the Investment Platform for Asset Management, embedding all AI and Quant models, implemented end-to-end Azure DevOps CI/CD
  - Built a fully automated Bloomberg PORT API integration with validation and fallback, replacing the previous data provider (in production).
  - Built ELT/ETL and analytical pipelines integrating internal systems and external data providers (Bloomberg).
- **Applied AI Engineering & Research**:
  - Designed and implemented end-to-end production AI agents, combining RAG, internal data services, programmatic tools, validation guardrails, data verification, and LLM-as-a-judge evaluation. Total time saved : **+650hrs/year.**

DEC 24 - JUN 25 **PSL - Mines Paris -** ***Teaching Assistant*** **:** ***PARIS - FRANCE***

- Mathematics : Applied Maths for ML, and Linear Algebra
- Computer Sciences : Machine & Deep Learning, Generative Architecture, RAG

JUN 24 - DEC 24 **EDMOND DE ROTHSCHILD - Data Scientist** ***LUXEMBOURG, LUXEMBOURG***

Static Data Department - (internship) :

- Automated investment strategies of Fixed Income, multivariate calculus (Gini index), + **98%** Time Saving
- Development of tools to ensure data integrity, **+30000** securities
- Development of an automated pricing analysis tool

EDUCATION

AUG 25 - NOW **Mines Paris PSL – Master's in Financial & Applied Mathematics (4.00/4.00 GPA)** ***PARIS - FRANCE***

- **Main courses :**
  Times Series Analysis, Causal Inference, Representation Learning, MLOps & Deployment, Cloud Infrastructure & Data Engineering, Blockchain, derivative Pricing
- **Selected Academic Projects:**
  Electricity Demand Forecasting : Developed and compared three forecasting approaches (SARIMA, LightGBM, and Deep Learning) to outperform RTE's day-ahead French electricity demand forecasts, reduction in RTE's MAPE : **+41%** [Project]

AUG 23 - JUN25 **Mines Paris PSL – Bachelor in Data & Business (3.98/4.00 GPA) – Valedictorian** ***PARIS - FRANCE***

- **Main courses :**
  Machine and Deep learning, Analysis, Stochastic Calculus, Probability & Statistics, Linear Algebra, Finance, Economy
- **Hackathon :**
  LVMH, Financial x Suistainable ROI modeling **(1st Place)**
  L'Etudiant, Improving organic convertion on event **(1st Place)**

COMPETITIONS

SEP 25 **Morgan Stanley – Systematic Trading Hackathon (3rd place)** ***PARIS - FRANCE***

An invitation-only cohort of 100 selected students from across Europe | Strategies :

- Directional Momentum Strategy
- Order Book Depth Arbitrage Strategy

APR 25 **IMC – Quantitative Trading Competition (Top 1%)** ***PARIS - FRANCE***

***World Wide Trading Competition Prosperity* | (112 / 12,870) | *Strategies* :**

- Options trading strategy, Implied volatility arbitrage, Delta & Vega Hegding, win rate : **76.03%**
- ETF Pricing Arbitrage, based on the index and its synthetic counterparty, win rate : **74.26%**
- Market divergence, enhanced by an ML model, trained in a real-time rolling window, win rate : **92.25%**

FEB 24 **Quantitative Research Hackathon (1st place)** ***PARIS - FRANCE***

EDMOND DE ROTHSCHILD ASSET MANAGEMENT (presented to partners) | Strategies :

- Alpha signal filtration using Machine Learning, ranked signals using Sharpe Ratio
- Identify and predict variations in Asset Under Management, Accuracy : **+85%**

PUBLICATION

OCT 26 ***Multi-Resolution Time Series Transformer :***

- Implemented and publish indipendent interpretation of the MTST architecture from the AISTATS 2024 paper, including multi-scale tokenization of the series, parallel self-attention and relative positional encoding [Paper] [Package] [Model]

SEP 25 ***SPECS-Transformer :***

- Transformer Architecture for Volatility Forecasting with Signal-Spectrum Dynamics, Published on Zenodo – Bizeul A.[DOI]

EXTRA CURICULAR

LANGUAGES : French (native) | Italian (native) | English (fluent) | German (basis)

SOFT SKILLS : Communication | Teamwork | Autonomous | Seriousness | Problem solving

HOBBIES : Running : 10km de 2026 Rolland Garros in 43:56 , Gym, Biking : gold medal GEC 2018 (500+ participants)

HARD SKILLS : Python | React | Angular | Scikit-learn | PyTorch | npm | Docker | GCP | Terraform | Ariflow | Mlflow | Kubernetes
